

IFB No.	Name of Consultancy Service/Assignment	Description of the Services
MWE/ CONS/18- 19/00028/1	Assignment 1: Consultancy services for detailed design and construction supervision of Bundibugyo water supply and sanitation systems; design review and construction supervision of Kyenjojo-Katoke water supply and sanitation system and feasibility studies in 4No. strategic water supply systems in Western Uganda	The services under these assignments shall include: Feasibility Studies: Assessment of the water resources potential for town water supply; Carry out a baseline and socio-economic survey; Determine the per capita consumption and estimate the anticipated demand for water supply and sanitation services; Preparation of a preliminary water supply design option(s); assess the feasibility of incorporating renewable energy in the water supply system; conduct a financial analysis for each town; Assessing potential environmental impacts for all the water supply and sanitation options and propose mitigation measures.
MWE/ CONS/18- 19/00028/2	Assignment 2: Consultancy services for design review and construction supervision of Nakasongola and Dokolo town Water Supply and Sanitation Systems; detailed design and construction supervision for expansion of Kapchorwa town water supply and sanitation system and feasibility studies in 3No. strategic water supply systems in Eastern Uganda	Detailed Design: Conducting detailed engineering surveys and designs, prepare detailed hydraulic narrative engineering designs, technical specifications, bills of quantities, drawings and engineering cost estimates including tender documentation and propose catchment protection mechanisms with emphasis on water shed and source protection. Design Review: Assess the feasibility, detailed designs including tender documents for adequacy to meet the current and future demand. Prepare improved design and tender documents, basing on the review. Assess the potential environmental impacts for all the water supply and public sanitation options and propose mitigation measures as per NEMA guidelines.
MWE/ CONS/18- 19/00028/3	Assignment 3: Consultancy services for design review and construction supervision of Kayunga-Busana (Phase II) Water Supply and Sanitation	Construction Supervision: On behalf of the client, supervise construction of the town water supply and
	Systems; detailed design and construction supervision of Buikwe and Kamuli water supply and sanitation systems and feasibility studies in 3No. strategic water supply systems in Central Uganda	sanitation systems and execution of all obligations entrusted to the Engineer in accordance with the contract between the Client and Contractor. Establishment of O&M structures: Support the client in establishment of appropriate O&M structures for effective operation of the new/improved water supply system. Duration of each Assignment: 30 months
